BACKGROUND

I started Information Technology in high school from grade 9-12. In grade 9 we were introduced Scratch to get understanding of coding and then we then taught Delphi. It was an interesting subject because we were using a different language. Grade 12 we were taught Java coding.

SKILLS

HTML, CSS, Javascript , Java, UI/UX, SQL

INTERESTS

PHP, C++, Algorithm implementation ,Database management software

WORK EXPERIENCE

2021-04 - Current **Junior Software Developer**

Younglings, Cape Town, Republic Of South Africa

As a Junior Software Developer I am creating programs and also participating in hackathon. The programs that we do is to create a website from scratch. And the hackathon helped me to be a creative thinker because in a hackathon you are only given a theme that you need to focus on and you will have to have to think of a program that you may create. We are also given the opportunity to choose a course that you want to do on udemy.

2020-03 - 2021-02 **Digital Associate**

CapaCiti, Cape Town, Republic Of South Africa

In CapaCiti we were divided into different streams and I chose Java. We were taught about Java coding and then we did a website for a school. And we were also taught how to save your work on github.

EDUCATION

2019-01 - 2021-11 **NQL LEVEL 4**

Center of Science And Technology - Ilitha Park, Khayelitsha,7784
